

BIG

BIG GOLD INC

STRATEGICALLY POSITIONED GOLD EXPLORER
LOCATED IN THE KENORA/RAINY RIVER
MINING DISTRICT OF ONTARIO

FALL 2022

BIGGOLD • CA

CSE BG

LOW-COST EXPLORATION AND STRATEGIC LOCATION IN ONTARIO

- Big Gold is an Ontario-based exploration company with a land position of over 10,000 hectares close to the new Rainy River Mine Complex which has all the necessary infrastructure, giving our project a distinct advantage.
- Big Gold management and advisors have decades of experience and a history of success defining economic gold resources and financing exploration companies, as well as taking them public.
- Big Gold will take advantage of the ability to raise funds utilizing Ontario's exploration expense flow-through tax credits.
- The technical team advising Big Gold has a history of world-class deposit discoveries and has vast experience taking projects from early exploration stage through to production.
- **Big Gold trades on the CSE under the ticker symbol 'BG'.**

VISION – LED BY EXPERIENCE

VISION DISCOVER AND DEFINE
AN ECONOMIC GOLD DEPOSIT AT
OUR MARTIN KENTY GOLD PROJECT
LOCATED NEAR KENORA, ONTARIO

MINING LEADERSHIP EXPERIENCE

Big Gold's team members have held senior leadership positions in Canada's resource and consumer facing companies across a range of primary and ancillary businesses.

Public capital raising
over \$250,000,000 CDN 2016 to date

>40 YEARS OF EXPLORATION EXPERIENCE

The Big Gold team consists of experienced leaders in Canadian exploration in public and private markets.

A large, circular graphic with a dark blue background and a white border. Inside the circle, the word "BIG" is written in a large, bold, gold-colored font with a reflection effect below it. The circle is positioned in the center of the slide, with white diagonal lines extending from its corners towards the corners of the slide.

BIG

SUCCESSFUL COMPANY BUILDING

The Big Gold team has successfully built and commercialized leading private and public businesses across various sectors in Canada.

Our team brings the focus and experience needed to efficiently explore, execute on plan and build a high-impact exploration business.

MARTIN KENTY PROJECT (MKP) TIER 1 MINING JURISDICTION

KENORA/RAINY RIVER MINING DISTRICT

Large Land Package

- 10,100-hectare project located in a Tier 1 mining jurisdiction

Significant Gold Potential

- Mineralization identified historically – no modern exploration undertaken on the property

Good Infrastructure

- Due to the development of Rainy River Mine Complex and forestry industry

First-Class Technical Team

- Responsible for significant Ontario gold discoveries

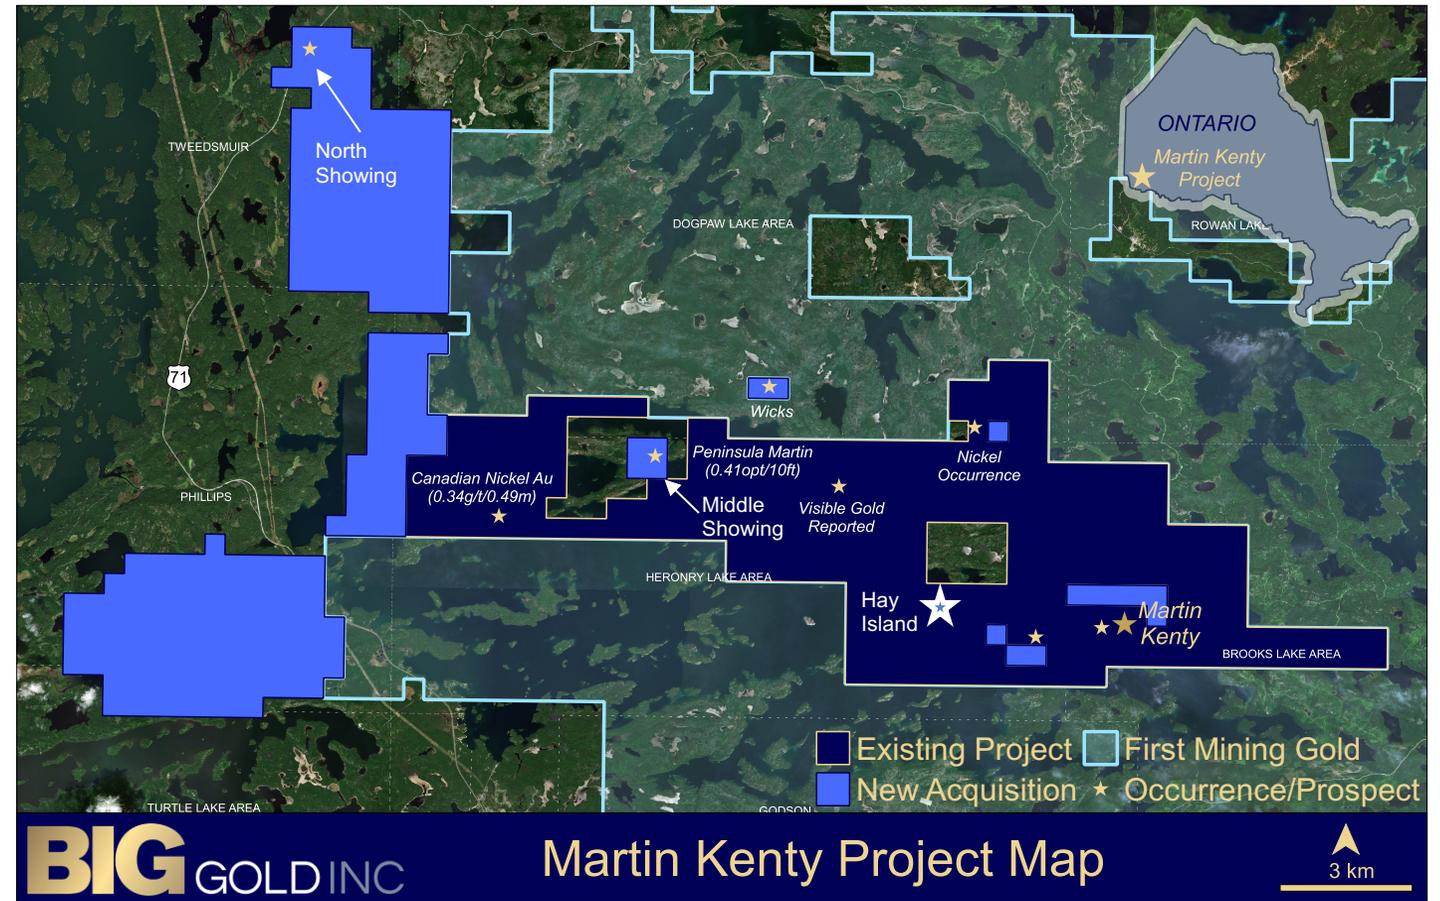

MARTIN KENTY PROJECT (MKP)

LOW-COST, HIGH-IMPACT EXPLORATION

MKP hosts key attributes consistent with a gold enriched system that is deep seated and extensive:

- Gold mineralization is primarily associated with strong alteration and sulphides, a trait common to Hemlo-style gold deposits.
- Project straddles major geological rock unit contacts with fracturing and shearing; precipitation of mineralizing fluids that could be gold bearing.
- Project covers the major strong lineaments that mark the location of significant structures that are known to host gold mineralization discovered in outcrop more than 75 years ago.

POTENTIAL DRIVEN BY HISTORY

Roy Martin Showing

- Historic trenching reported gold values of 2.8 g/t over ~1.5 metres – no follow-up

East Island Showing

- Reported gold values across 3 trenches:
 - TR1: 9.3 g/ton Au over 3.5 metres
 - TR2: 5.0 g/ton Au over 4.3 metres
 - TR3: 4.7 g/ton Au over 5.5 metres

Hay Island Showing

- Historical estimation of 109,000 tons of material grading 7.78 g/t Au*. Potential for significantly increased tonnage.

Mongus Lake Showing

- Reported pyrite, chalcopyrite and visible gold (no assays returned)

*All technical information in this document is historical in nature, and while the Company and the QP consider the information to be generally correct and relevant to the project, it should not be relied upon.

MARTIN KENTY PROJECT (MKP)

PRELIMINARY SAMPLING PROGRAM

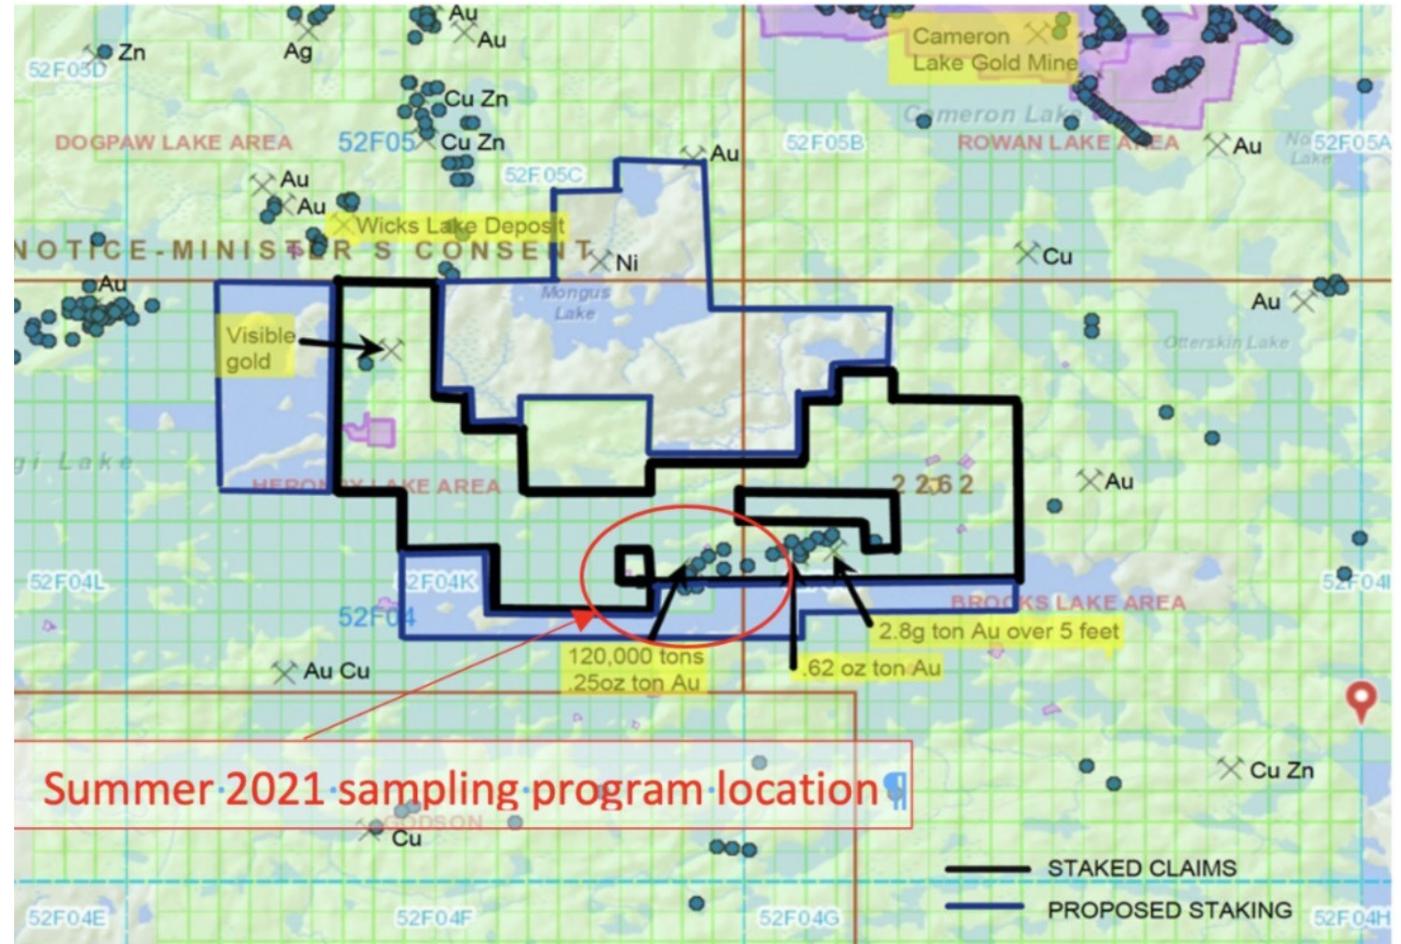

Preliminary Sampling Program

Completed in summer 2021, preliminary sampling on-site returned strong gold grades with traces of silver and base metals such as copper, lead, and zinc.

Sampling was completed on the Hay Island Showing located on the south-east end of the property.

Sampling highlights include:

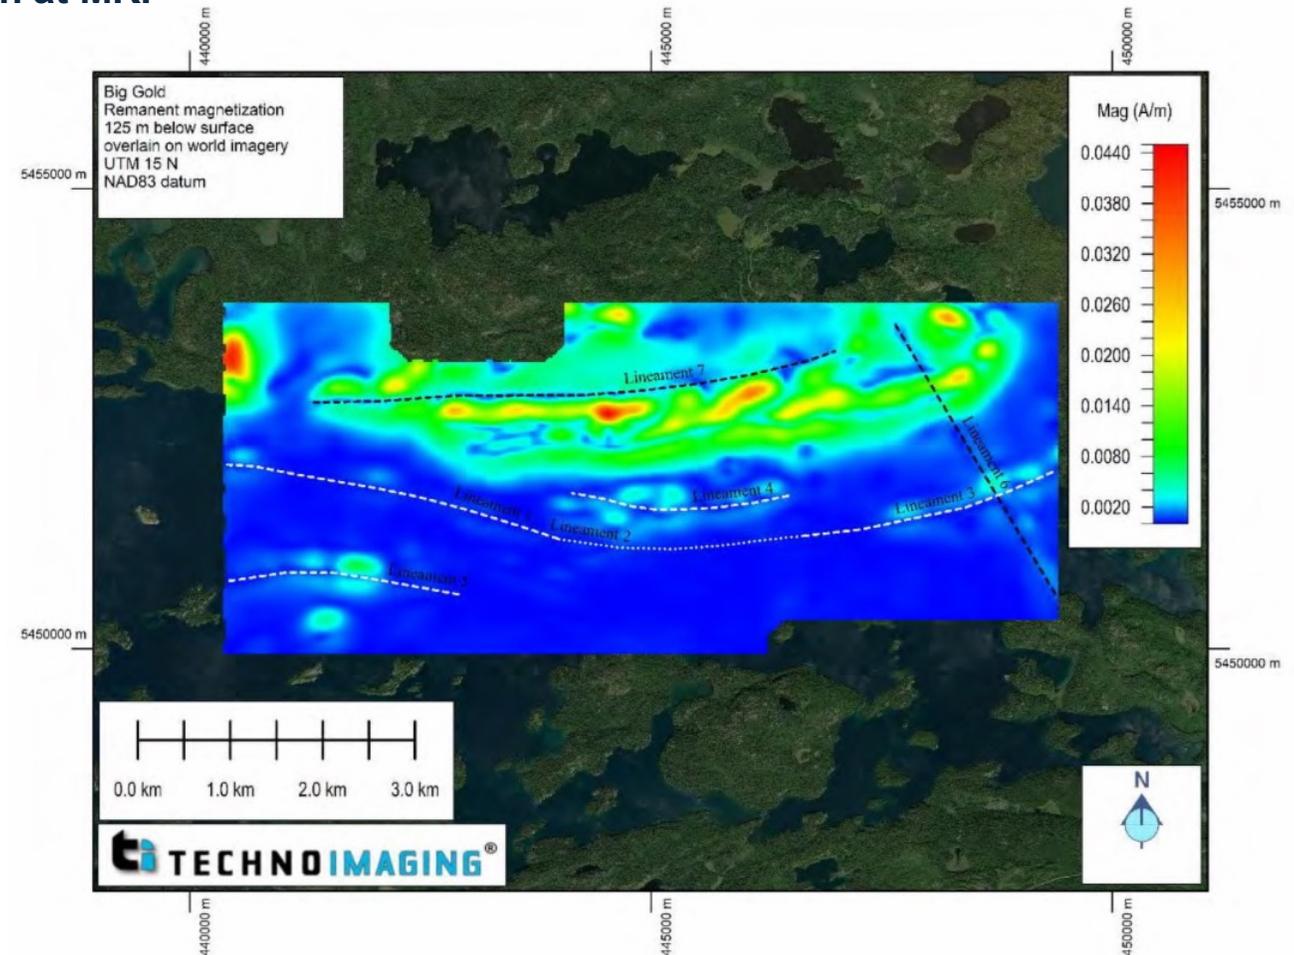

Sample ID	Au (g/t)	Ag (g/t)
E5105130	2.01	0.50
E5105132	7.23	2.30
E5105133	25.40	3.90
E5105137	2.50	1.20
E5703331	1.70	1.10

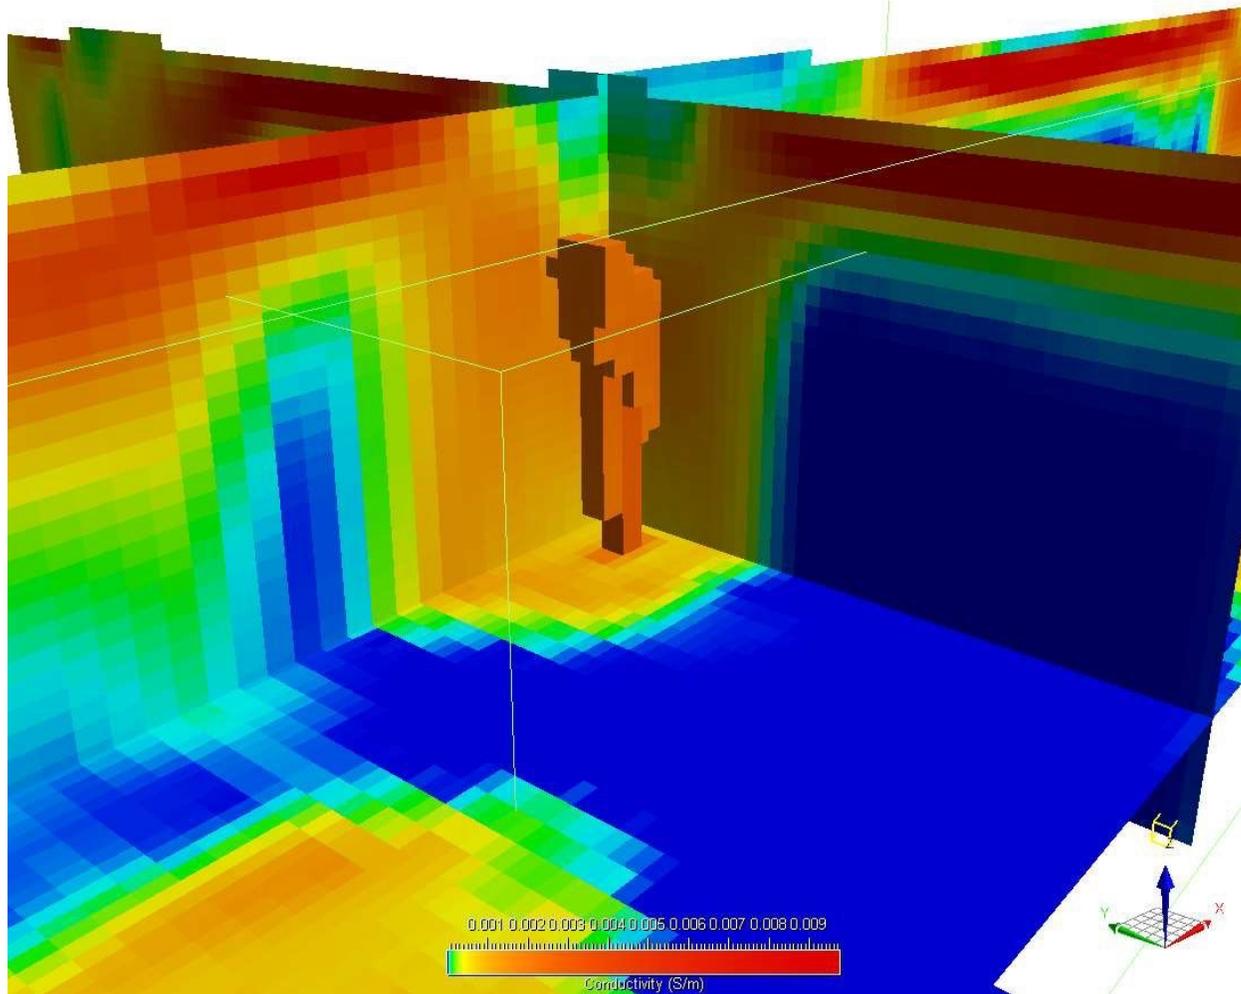

VTEM AND TMI SURVEY COMPLETED

What the VTEM and TMI results mean for exploration at MKP

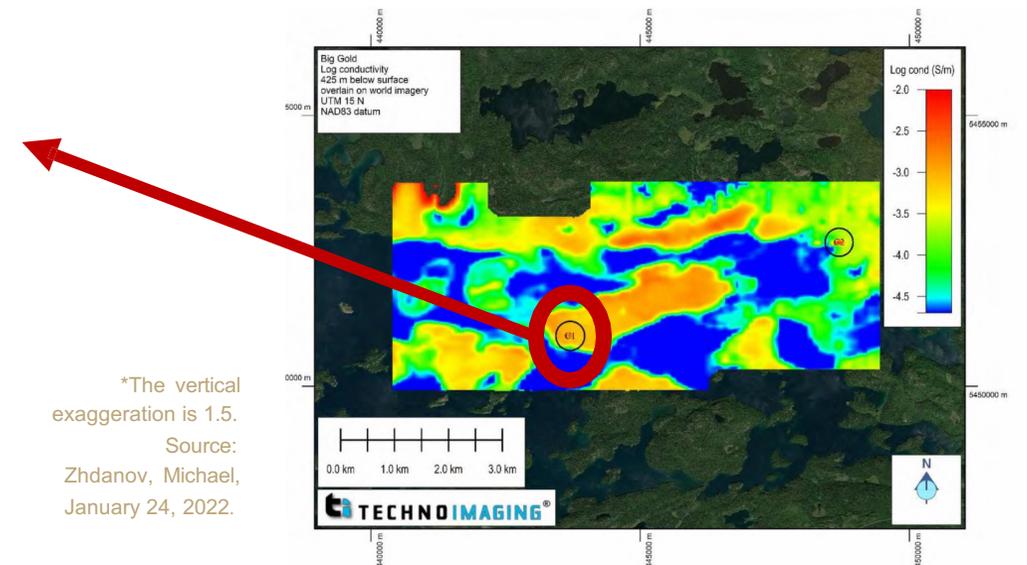

- 365 line-km VTEM and Total Magnetic Intensity (TMI) survey generated important targeting data:
 - prospective structures
 - potential hotspots for initial drilling program
- 3D conductivity and chargeability models show that MKP hosts key attributes consistent with a gold-enriched system that is deep-seated and extensive.
- The historical gold mineralization at the MKP and in the surrounding area is typically found with sulphides, and the VTEM survey identified numerous chargeable bodies along the known gold-bearing E-W structural corridor.
- Lineaments in the 3D remanent component of the magnetization vector are of interest. They are parallel to, or adjoining, the shear zone with high gold intercepts from drilling.
- Results allow us to be confident in our initial theory – this style of gold mineralization appears to be similar to the deposits of the Hemlo camp.

MARTIN KENTY PROJECT (MKP) PRIORITY TARGETS

- Chargeability anomalies warrant further investigation for gold and disseminated sulphide mineralization.
- Example: Conductive anomaly C1
 - Vertical planes of conductivity plus isosurfaces at a constant conductivity are shown.
 - Body C1 with an isosurface at 0.002 S/m. The geometry of the body can be clearly seen.
 - The body is about 400 m in depth extent and 200 m depth-to-top. The full section depth extent is about 600 m.*

*The vertical exaggeration is 1.5.

Building Strong Fundamental Value through Exploration

Low Capex Strategy

- Big Gold's technical team are BG shareholders. Their technical partnership with Big Gold provides full suite of expert teams that have a history of working in the area and specialize on Ontario. The suite includes:
 - Prospectors
 - Field Geologists and a QP
 - Geophysics/Geoscientists
 - Drilling team / Drilling Equipment
- Big Gold's low capex strategy is a major advantage as there is a shortage of experienced personnel and equipment.

Favourable Tax Environment

- Ontario provides a unique tax opportunity for exploration expenses. In addition, the property is located 80 km from Kenora, an established mining services community.

Capital Preservation & Organic Growth

- With the added pressure of a volatile capital market, investors who share our vision for gold exploration are struggling to find good teams with local properties that limit downside travel risk for management while still providing excellent exposure to the Ontario gold sector. Big Gold's conservative capital strategy allows it to continue exploration with a focus on discovering and defining gold mineralization.

LED BY PEDIGREE

Management – Strong Capital Markets Team

- **Scott Walters – President and CEO, Director**
 - +20 years of capital markets, fund management and start-up experience, focused on mining, oil & gas, and consumer industries
- **James Macintosh – Corporate Advisor**
 - +30 years of experience in the mining sector. Specializes in start-up exploration companies in North America.

Board of Directors

- **Scott Walters – Executive Director**
- **Christine Carson – Independent Director**
 - Founder of Carson Proxy Advisors and Board member of Americas Gold and Silver Corporation (TSX: USA)
- **Glenn Thibeault – Independent Director**
 - Former Canadian politician including member of Provincial Parliament for Sudbury and Minister of Energy for Ontario
- **Bob Leshchyshen – Independent Director, Audit Committee**
 - +30 years of experience in capital markets and banking
- **Peter Ball - Independent Director**
 - +30 years of experience in capital markets and mining, President and CEO of Noram Lithium Corp.

Bruce Durham

Qualified Person, Technical Advisor

- Credited with the discovery of several significant economic mineral deposits including:
 - the David Bell Mine (Hemlo),
 - the Golden Giant Mine (Hemlo),
 - the Redstone Nickel Mine (Timmins) and
 - the Bell Creek Mine (Timmins)

MARTIN KENTY PROJECT WORK PROGRAM

Phase 2 Exploration Program – Q3-Q4 2022

- Targeted ground geophysical survey
- Expanded mapping and surface sampling near priority targets
- Test program of till sampling and lake sediment survey

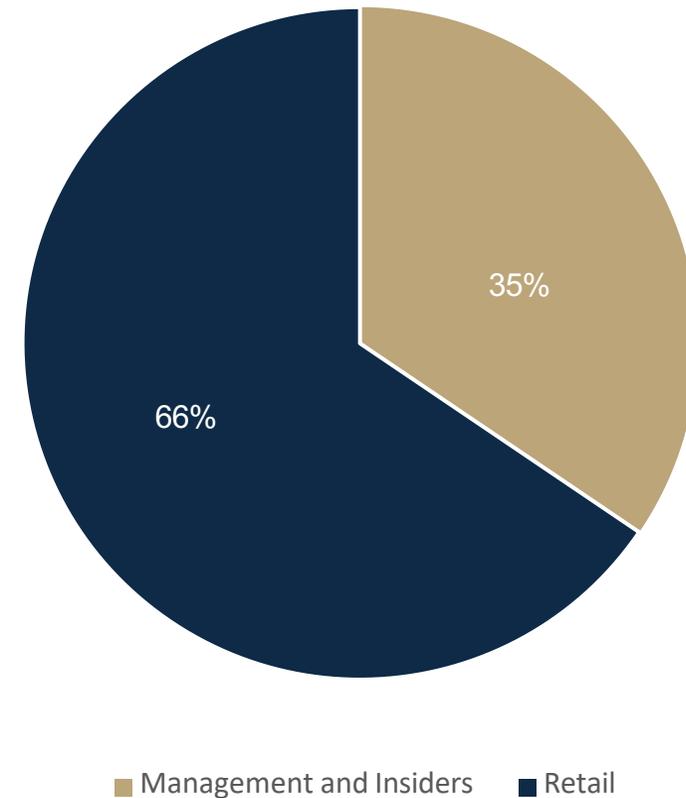

Phase 3 Exploration Program – Q1 2023

- Drilling program of 1,500 to 3,000 metres

FINANCIAL STRUCTURE

Issued & Outstanding	22,802,099
Cash as of Sep 2022	\$450,000
Financing Warrants @ 30c exp. Dec 13/2023	2,536,880
Options @ 20c (650k issued to Directors & 1.25m issued to Consultants)	1,900,000

FORWARD-LOOKING STATEMENTS

Information set forth in this presentation may contain forward-looking statements. Forward-looking statements are statements that relate to future, not past events. In this context, forward-looking statements often address a company's expected future business and financial performance, and often contain words such as "anticipate", "believe", "plan", "estimate", "expect", and "intend", statements that an action or event "may", "might", "could", "should", or "will" be taken or occur, or other similar expressions. By their nature, forward-looking statements involve known and unknown risks, uncertainties and other factors which may cause our actual results, performance or achievements, or other future events, to be materially different from any future results, performance or achievements expressed or implied by such forward-looking statements. Such factors include, among others, the following risks: the risks associated with outstanding litigation, if any; risks associated with project development; the need for additional financing; operational risks associated with mining and mineral processing; fluctuations in gold and other commodity prices; title matters; environmental liability claims and insurance; reliance on key personnel; the potential for conflicts of interest among certain officers, directors or promoters with certain other projects; the absence of dividends; competition; dilution; the volatility of our common share price and volume; and tax consequences to U.S. Shareholders. Forward-looking statements are made based on management's beliefs, estimates and opinions on the date that statements are made, and the Company undertakes no obligation to update forward-looking statements if these beliefs, estimates and opinions or other circumstances should change. Investors are cautioned against attributing undue certainty to forward-looking statements.
